

Springer Healthcare is the EXCLUSIVE worldwide distributor for English and translated language reprints & ePrints*, for the highly prestigious and globally respected British Editorial Society of Bone & Joint Surgery.

Bone & Joint Publishing has a worldwide reputation for attracting the best clinical research and educational articles in orthopaedics and trauma. The journal is widely recognised for its broad international coverage, world-class peer review and unique, trusted editorial style.

The Bone & Joint Journal

is the flagship publication under the Bone & Joint Publishing umbrella. BJJ is one of the most valued sources of information for orthopaedic surgeons and researchers globally since its inception in 1948. Its core mission is to advance and improve education in orthopaedic surgery, as well as the diffusion of knowledge in new and improved methods of teaching and practice.

Bone & Joint Research

launched in October 2011 and accepts papers across the whole spectrum of the musculoskeletal sciences. As an Open Access journal, BJR greatly increases global access to this vital research.

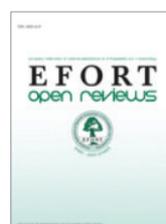

The Journal of Children's Orthopaedics

is the official journal of the European Paediatric Orthopaedic Society. The journal publishes high quality, peer-reviewed articles that focus on clinical practice, diagnosis and treatment of dis-orders unique to paediatric orthopaedics, as well as on basic and applied research.

Bone & Joint 360

is an essential digest journal for busy orthopaedic surgeons. The Editorial Board scans the global scientific literature to summarise the most important and significant advances. They draw out the bottom-line clinical message in a quick and easy read, broken down by subspecialty.

EFORT Open Reviews

publishes high-quality instructional review articles across the whole field of orthopaedics and traumatology. Commissioned, peer-reviewed articles from international experts summarize current knowledge and practice in orthopaedics, with the aim of providing systematic coverage of the field. All articles undergo rigorous scientific editing to ensure the highest standards of accuracy and clarity.

Benefits of reprints and ePrints:

- Aligns your product with the World's leading medical authors and thought leaders in the healthcare industry
- Provides the opportunity to educate and access your target audience
- Reprints and ePrints can be customized, including options for journal covers and translations

Article reprints and ePrints continue to act as the cornerstone of communication between medical research and clinical practice. With over 40 years of market experience, Springer Healthcare has a reputation for providing independent and high-quality publications to help objectively disseminate powerful information about your products.
